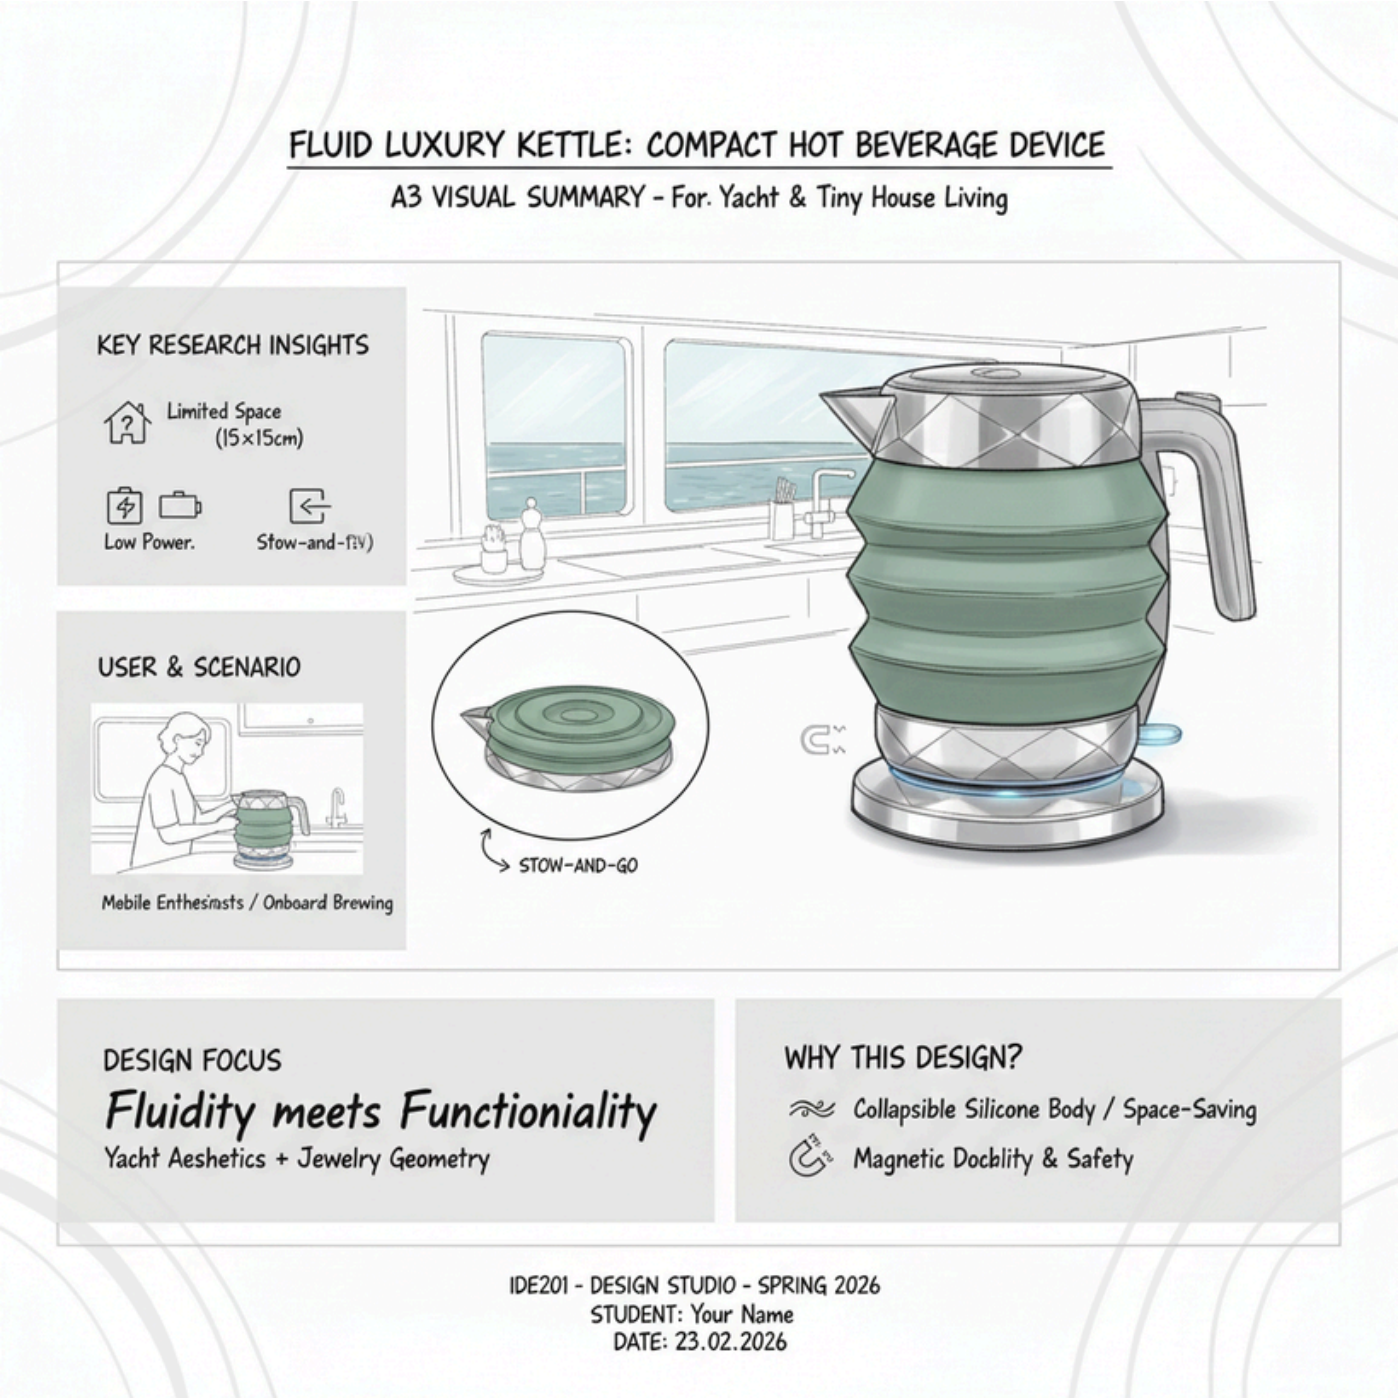
- *Phase 1: The Portable Anchor (Focus: Stabilization)*
- *Phase 2: The Grog Concept (Focus: Ritual & Capsules)*
- *Phase 3: The Technical Pivot (Focus: Manual Drip & Feasibility)*
- *Phase 4: The Final Form (Focus: Standalone Luxury & Simplicity)*

Milestone 1 - The Portable Anchor



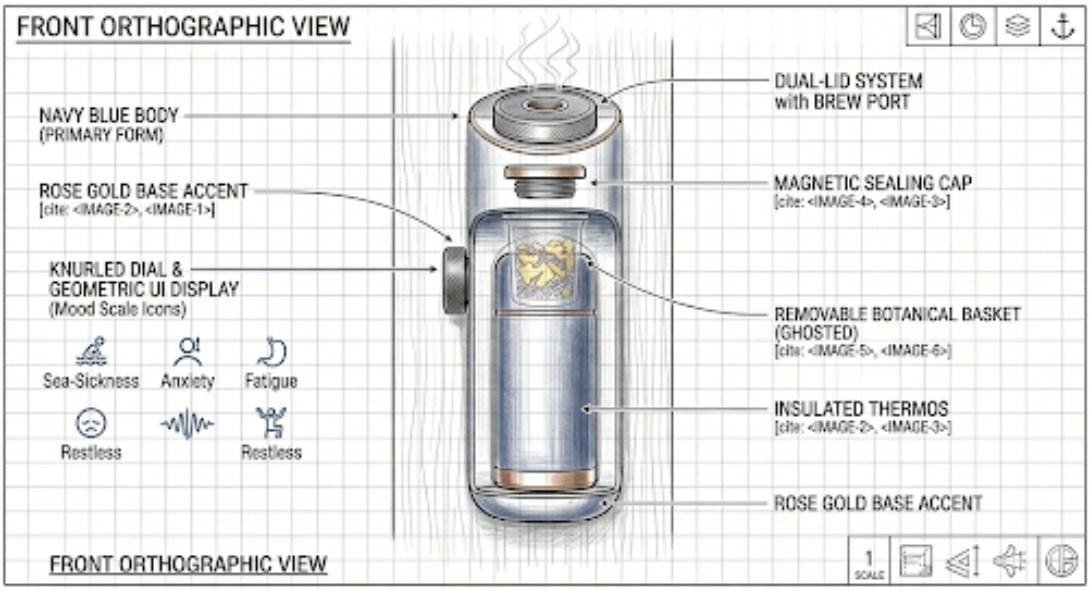
- Keywords: Motion-sickness, portability, suction-base, medical-aesthetic.
- Impactful Prompt: "Brainstorm portable device concepts for sea-sickness, focusing on table stabilization."
- AI Role Tag: Expander
- AI Response Summary: Suggested low-center-of-gravity forms and suction mechanisms for ocean turbulence.
- Reflections: Strong stabilization idea, but felt too "medical" for a luxury cruise.
- Design Decisions: Shift focus from medical treatment to a premium wellness ritual.
- Action: * Accepted: Stabilization concept.
- Rejected: Medical aesthetic & extreme portability.
- Transformed: Portable device into a fixed cabin unit.

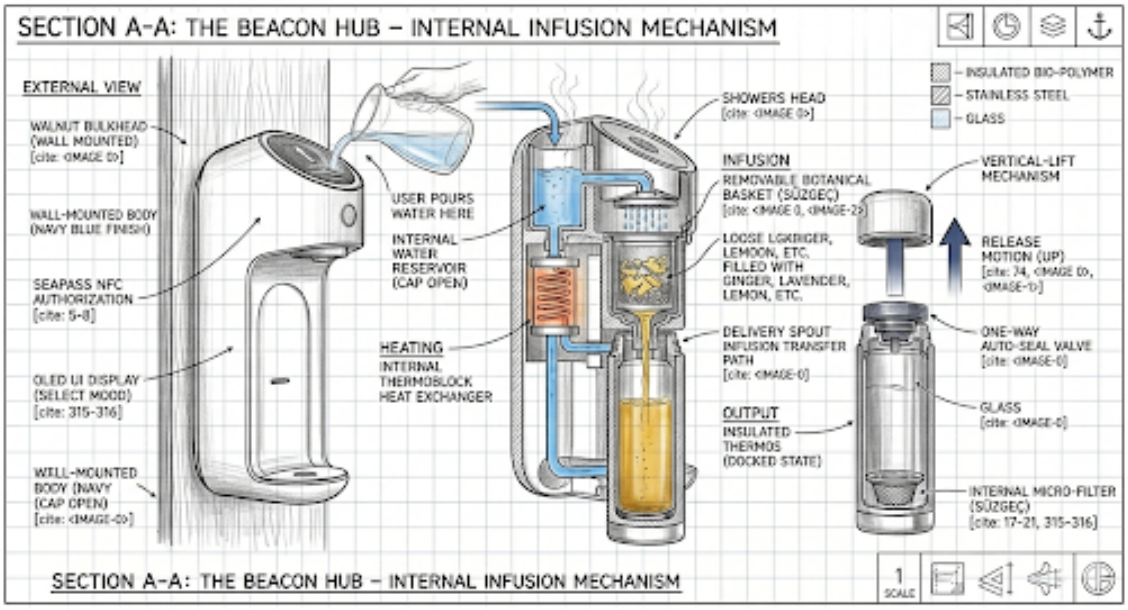
Milestone 2 - The Grog Ritual & Capsules

- Keywords: Grog metaphor, capsule system, maritime history.
- Impactful Prompt: "Modernize the maritime 'Grog' ritual into a wellness experience using a capsule system."
- AI Role Tag: Re-framer
- AI Response Summary: Framed beverage creation as a multisensory ritual using botanical capsules.
- Reflections: Great historical narrative, but single-use capsules cause hygiene and sustainability issues.
- Design Decisions: Keep the narrative, but eliminate plastic waste and complex tech.
- Action: * Accepted: The Grog wellness metaphor.
- Rejected: Capsule system & complex sensors.

Milestone 3 - The Technical Pivot (Manual Drip)

- Keywords: Drip-infusion, zero-waste, internal süzgeç, vertical-release.
- Impactful Prompt: "Suggest a zero-waste mechanical alternative based on filter coffee makers for a moving vessel."
- AI Role Tag: Critique & Clarifier
- AI Response Summary: Highlighted the mechanical simplicity of a gravity-fed drip-infusion with a reusable botanical basket.
- Reflections: Crucial for feasibility. A manual filter is more authentic and mechanically reliable at sea.
- Design Decisions: Implement manual infusion with a vertical-lift thermos release to prevent spills.
- Action: * Accepted: Reusable botanical basket (süzgeç) & vertical extraction.
- Transformed: Complex brewing into a simple, analog mechanism.





Milestone 4 - The Final Refinement (Standalone Luxury)

- Keywords: Standalone desktop, navy blue & rose gold, visual fidelity, simplicity.
- Impactful Prompt: "Refine into a standalone desktop appliance. Maintain navy/gold CMF, remove wall-mount and visible hopper."
- AI Role Tag: Clarifier
- AI Response Summary: Defined geometric proportions for desktop stability and finalized "silent luxury" materials.
- Reflections: Wall-mounted limits placement. A standalone plug-in is practical, and a hidden filter is aesthetically cleaner.
- Design Decisions: Finalize as a plug-in desktop unit with brewing happening internally inside the nested thermos.
- Action: * Accepted: Standalone architecture, Navy/Gold palette, hidden internal filter.
- Rejected: Wall-mounted requirement & transparent botanical hopper.

Conclusion – AI Collaboration

Overall Reflection: "AI evolved from an Expander (generating initial concepts) to a highly critical Critique and Clarifier. It helped strip away unnecessary complexity (like capsules and wall-mounts) to reach a highly feasible, mechanically sound, and aesthetically refined final product grounded in reality."
