PROCESS INFOGRAPHY

AI ROLE CLARIFIER

Designer Context Definition

Keywords:
- Designer Background
- Service Design Perspective
- AI Collaboration

Selected Prompt:
"I Explained That I Am A 4th Year Industrial Design Student And That My Design Focus Is Service Design And User Experience."

AI Context Setup

Keywords:
- AI Collaboration
- Context Building
- Prompt Framing

Selected Prompt:
"I Explained The Project Brief And The Course Expectations So That AI Could Understand The Design Context."

AI ROLE CLARIFIER

AI ROLE CLARIFIER

Brief Understanding

Keywords:
- Design Brief Analysis
- Design Scope
- System Thinking

Selected Prompt:
"Based On The Design Brief, What Kind Of Design Problem Should Be Explored?"

Problem Framing Exploration

Keywords:
- Gym Culture
- Social Interaction
- Behavioral Design

Selected Prompt:
"Why Are Gyms Mostly Transactional Spaces?"

AI ROLE EXPANDER

AI ROLE EXPANDER

Post-Workout Moment Discovery

Keywords:
- Recovery Moment
- Slowdown Phase
- Behavioral Transition

Selected Prompt:
"What Happens Psychologically After A Workout?"

AI ROLE EXPANDER

Recovery Ritual Exploration

Keywords:
- Recovery Drinks
- Metabolic Recovery
- Slow Interaction

Key Thing:
- The Product Is Metabolically Beneficial.
- Social Interaction Can Emerge Naturally.

System Thinking Shift

Keywords:
- Product Vs System
- Ritual Design
- Experience Design

Reflection:
This Discussion Shifted The Focus Of The Project From Designing A Single Device To Designing A Social System Supported By A Product.

AI ROLE REFRAMER

AI ROLE EXPANDER

Spatial Concept Exploration

Keywords:
- Interaction Design
- Social Space
- Circular Gathering

Reflection:
Through Discussions With AI, Different Spatial Interaction Models Were Explored.

Product Accessibility & Safety

Keywords:
- Circular Accessibility
- Shared Interaction
- Heat Safety

Reflection:
In A Circular Seating Arrangement, Users Sitting On Different Sides Of The Table Must Be Able To Interact With The Device.

AI ROLE CRITIQUE

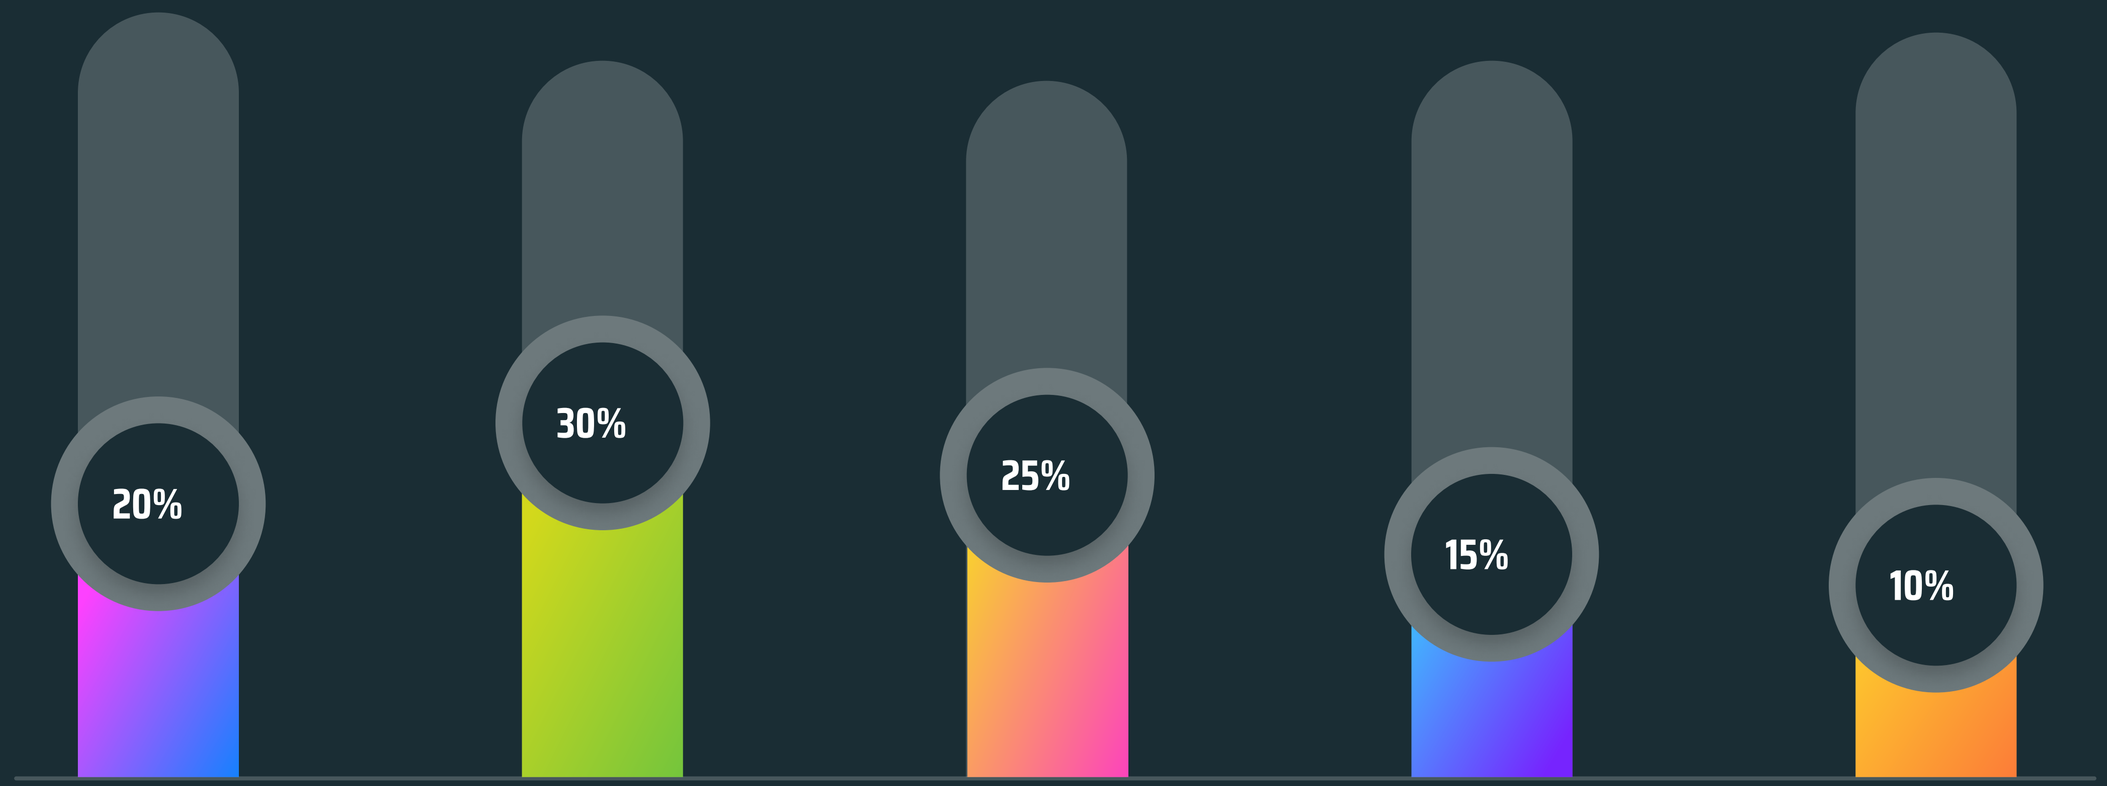
AI ROLE CRITIQUE

System Integration

Keywords:
- Gym Membership System
- Reward Mechanism

Reflection:
The System Could Integrate With Gym Membership Cards To Encourage Usage And Create A Recovery Ritual Within The Gym Environment.

AI USAGE IN THE DESIGN PROCESS



PROBLEM CLARIFICATION

AI Was Used To Understand The Project Brief, Interpret The Design Problem, And Frame The Design Direction At The Beginning Of The Project.

BEHAVIOR ANALYSIS

AI Supported The Analysis Of Gym User Behavior, Post-Workout Routines, And Social Interaction Patterns Inside Gym Environments.

IDEA EXPANSION

AI Helped Expand Early Design Ideas Such As Recovery Rituals, Warm Beverage Concepts, And Spatial Interaction Possibilities.

DESIGN CRITIQUE

AI Was Used To Question Design Decisions Such As Automation Vs Ritual, System Design Vs Product Design, And Interaction Logic.

VISUALIZATION SUPPORT

AI Supported The Creation Of Conceptual Visualizations Used To Communicate The Design Idea And Environment.

WHAT I REJECTED

Forced Social Interaction

During The Interaction Exploration Phase, AI Suggested A Mechanism Where Two Users Would Need To Activate The Device Together In Order To Start The Brewing Process.

Automated Recovery Drink Dispenser

AI Suggested A Fully Automated Drink Dispensing System Where Users Could Quickly Select A Recovery Drink And Receive It Instantly.

PAUSA

GYM HOT BEVERAGE

Smart Nutrition Recovery Station

AI Suggested That Recovery Drinks Could Be Personalized Using Data Such As Training Intensity, User Preferences, Or Recovery Needs. This Approach Aimed To Create A Technologically Optimized Recovery System.

Mode Selection on Rotating Grip Band

AI Proposed Integrating Interaction Elements Directly Into The Grip Band So That Users Could Both Rotate The Device And Select Drink Modes From The Same Surface.

"I Rejected Many Ideas During The Process, But These Were The Major Ones."

WHAT I TRANSFORMED

Product Design to System Design

At The Beginning Of The Project, The Design Process Was Mainly Focused On Creating A Beverage Preparation Device For Gym Environments. During Discussions With AI, It Was Emphasized That The Project Could Be Considered Not Only As A Product But Also As A System That Influences User Behavior.

Linear Layout to Circular Layout

In The Early Concept Exploration Phase, Linear Spatial Arrangements Were Also Considered For Placing The Recovery Drink System Inside The Gym. During These Discussions, AI Highlighted That Circular Arrangements Often Encourage Shared Visibility And Interaction Among Users.

PAUSA

GYM HOT BEVERAGE

Coffee Concept to Recovery Tea Ritual

At The Beginning Of The Project, The Idea Focused On Coffee Consumption, Since Coffee Is Commonly Associated With Gym Environments And Energy. During Discussions With AI, It Was Highlighted That Coffee Is Often Connected With Performance, Stimulation, And Speed, Which Aligns More With An Active Workout Mindset.

Functional Optimization to Behavioral Design

At The Beginning Of The Project, The Design Direction Was Mainly Focused On Optimizing The Beverage Preparation Process. During Discussions With AI, It Became Clearer That The Real Value Of The Project Was Not In Improving Functionality But In Designing A Behavioral Transition Moment Within The Gym Environment.

"I Transformed Many Ideas During The Process, But These Were The Major Ones."

WHAT I ACCEPTED

Manual Brewing Ritual

AI Contribution:
AI Helped Question Whether The Drink Should Be Automatically Prepared Or Manually Brewed.

What I Applied:
The System Keeps The Brewing Process Manual, Allowing Users To Prepare And Pour Their Own Tea To Maintain The Ritual.

Recovery Tea as Metabolic Support

AI Contribution:
AI Highlighted That Certain Herbal Teas Can Support Digestion, Metabolism, And Muscle Relaxation.

What I Applied:
The Drink Is Not Only Social But Also Physiologically Meaningful For Recovery.

PAUSA
GYM HOT BEVERAGE

Steam as a Sensory Signal

AI Contribution:
AI Discussions Highlighted How Sensory Cues Can Influence User Behavior.

What I Applied:
Visible Steam Became Part Of The Experience, Reinforcing The Slowdown Ritual After Workouts.

Shared Object as Social Catalyst

AI Contribution:
AI Discussions Highlighted How Shared Central Objects Can Become Social Focal Points In Environments.

What I Applied:
The Recovery Tea Device Was Positioned As A Shared Object At The Center Of The Island, Encouraging Natural Interaction.

MY DESIGN DECISIONS

MY MAJOR DECISIONS

major 01
360-degree accessibility idea

major 02
Gym Card Reader Integration

major 03
GYM CONCEPT

MY MINOR DECISIONS

Magnetic rotating platform

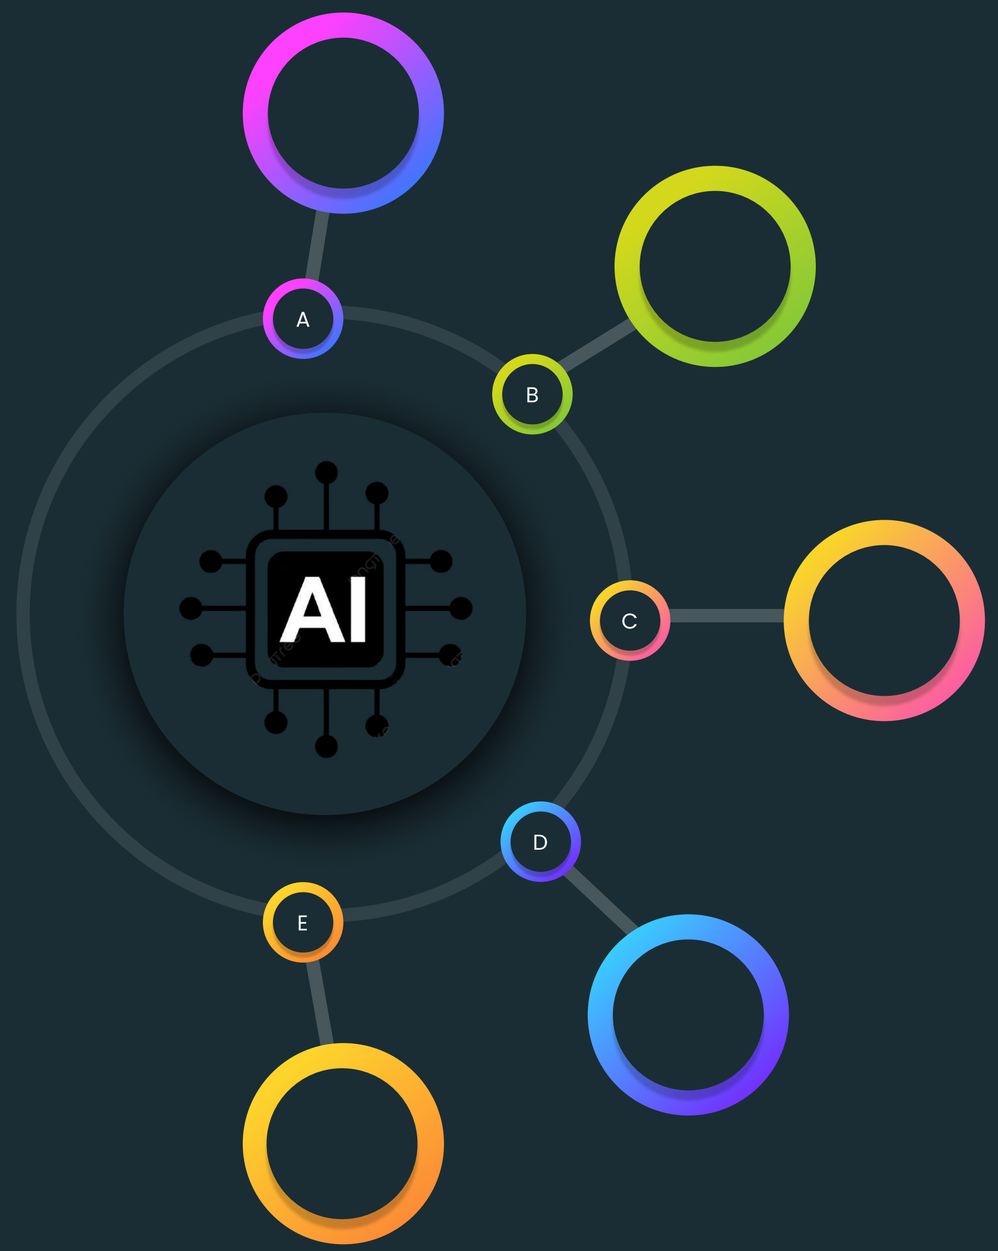
Rotational Grip Texture

Reward Mechanism

Mode Selection Interface

Transparent Glass Chamber

IMPACTFUL PROMPTS



A

Prompt

I'm A 4th Year Industrial Design Student And My Focus Is Mostly Service Design And User Experience. I'm Trying To Understand This Project Brief Better. Can You Help Me Interpret What Kind Of Design Problem This Assignment Is Actually Asking Us To Explore?

B

Prompt

When I Think About Gyms, Most People Just Come In, Work Out, And Leave Immediately. Why Do Gym Environments Feel So Transactional? Is There Something About The Way Gyms Are Designed That Discourages Social Interaction?

C

Prompt

After People Finish A Workout There Seems To Be A Short Moment Where They Slow Down Physically And Mentally. What Actually Happens During This Phase And Could This Moment Be Used As A Design Opportunity?

D

Prompt

I'm Thinking About Post-Workout Recovery. What Kinds Of Drinks Could Make Sense After Exercise? Are There Warm Drinks That Could Support Recovery While Also Creating A Slower Moment Compared To Typical Sports Drinks?

E

Prompt

If The Drink Is Prepared Automatically It Might Feel Like A Vending Machine. Would Keeping The Preparation Manual Create A Stronger Ritual Experience?

PRODUCT INTERACTION FEATURES

A Mode Selection Interface

Allows Users To Select Different Recovery Tea Modes Or Heating Settings Depending On The Type Of Herbal Tea Being Prepared. The Interface Keeps The Interaction Simple While Supporting Different Recovery Blends.

B Steam Flow

The Visible Steam Rising From The Device Reinforces The Post-Workout Cooldown Moment. It Creates A Sensory Signal That Encourages Users To Slow Down And Experience The Brewing Process Rather Than Consuming A Drink Instantly.

C Rotational Grip Texture

A Textured Grip Band Placed Around The Glass Body Allows Users To Safely Rotate The Kettle When Needed. It Prevents Direct Contact With The Hot Surface While Creating Friction To Comfortably Turn The Device Toward Their Side.

D Membership Card Reader

Gym Members Can Scan Their Membership Card To Access Their Weekly Or Monthly Recovery Tea Allowance. This Integrates The Product Into The Gym Ecosystem And Supports The Service System Behind The Experience.

E Magnetic Rotating Platform

The Kettle Sits On A Magnetic Rotating Base That Allows The Device To Be Turned Smoothly In A 360° Island Setup.
